CANDELABRA DISSIPATION TYPE LIGHTNING TERMINAL

Candelabra Dissipation Type Lightning Terminal is manufactured by Lightning Master Corporation from Florida, USA. Candelabra Air Terminal has static dissipating qualities. It is a delaying lightning protection system which is designed to reduce the incidence of direct lightning strikes to the protected structure.

This dissipator lightning terminal is used in a structural lightning protection system, offering stream delaying properties. Lightning Master products are Underwriters Laboratories (UL) listed air terminals.

Lightning Master Dissipation Air Terminals are being used by gas, water supply and telco companies, as well as, manufacturing plants and commercial buildings in the Philippines.
